JUL 2017 - JUL 2020

Monash College, Melbourne — *Bachelor of Engineering (IT stream)*

OCT 2016 - JUL 2017

Selected works/projects

Kontax Cam — *Instant camera hybrid app for digital and film photographers. (On the app store)*

Kontax Cam is an open-sourced app that I created as a way for photographers to take photos that just pop. It's an instant camera that has custom filters and effects personalised by me. Kontax cam website

SKILLS

Reliable and punctual

Comfortable working with a large project in an AGILE environment

Problem-solving skills

Long-term thinking

Intercultural competence

TECHNICAL SKILLS

Swift & SwiftUI

HTML, CSS, JS

ReactJS

NextJS, GatsbyJS

Styled components

PHP

Python

Version control (git)

UI/UX wireframe & design

Java

NookNook — *Powerful companion app for Animal Crossing: New Horizons. (On the app store)*

I developed this app since there are no apps on the app store with the functionality that I wanted. So, I came up with my own design and developed this app. The app uses various API and has lots of functionalities that's not present in others. [App store link](#)

Ghibliii—Studio Ghibli movie database for iOS, iPadOS, and MacOS.

Open source project for users to view all studio ghibli movies, mark them as watched (iCloud sync), see their descriptions, itunes link, imdb and rotten tomatoes reviews score, and many more! [View on github](#)

sMasheDe -Redefining news consumption, churn out unneccesary news, consume only what matters to you.

Landing page for sMasheDe built with React and TailwindCSS, integrated with Mailchimp for mailing list. [sMasheDe website](#)

Personal photography portfolio website

My own personal photography portfolio website, built using React, TailwindCSS, and contentful integration for REST api content. [Visit the website](#)
